with pace and precision.

NEXGEN FOOD PROCESSING

Maximizing Efficiency with Precision
Throughout Food Processing.

www.nexgenmachines.com

In today's competitive food and cashew processing industries, optimizing efficiency and quality is essential for success. NexGen understands the critical importance of advanced processing solutions in meeting these challenges.

PRODUCTIVITY AND QUALITY

Studies reveal that businesses utilizing advanced processing technologies experience up to a **25% increase in productivity and a 20% improvement in product quality.**

IMPACT OF INEFFICIENT METHODS

Moreover, inefficient processing methods can result in significant product wastage, with **up to 30% of raw materials being lost during processing.**

MARKET RISK WITHOUT MODERN SOLUTIONS

Additionally, with consumer demand for quality and safety on the rise, businesses without modern processing solutions risk falling behind their competitors and losing market share.

Recognizing these challenges, NexGen is dedicated to providing cutting-edge processing technologies that empower businesses to achieve optimal efficiency, quality, and competitiveness in today's dynamic market landscape.

NexGen stands as the solution to the aforementioned pressing challenges. With a steadfast commitment to innovation and excellence, we are revolutionizing food processing operations.

Our solutions streamline production, enhance product quality, and ensure safety. With NexGen, xou can trust in our ability to elevate xour food processing to new levels of efficiency and excellence.

OUR PRODUCT

Garlic Peeling

- **Material:**
Stainless steel 304 construction for durability and food safety

- **Capacity:**
Processes up to 100kg of garlic per hour

- **Power:**
Electric-powered with efficient energy usage

- **Adjustable Settings:**
Customizable peeling intensity and speed.

- **Improved Hygiene:**
Promote hand washing compliance and reduce the risk of infections with touchless hand hygiene solutions

- **Convenience:**
Enable easy and convenient hand hygiene practices for users of all ages and abilities

- **Cost-Effective:**
Save on water usage and maintenance costs with efficient and hygienic hand washing solutions

- **Versatility:**
Suitable for a wide range of applications, including healthcare facilities, restaurants,

Ginger potato washer GWP

- **Capacity:**
Washes and peels a large quantity of ginger and potatoes per hour to meet production demands

- **Optional Feature:**
Washing with ozonated water for additional disinfection

- **Operation:**
Centrifugal force for rapid and thorough drying

- **Washing Mechanism:**
Agitation provided by an air blower for effective washing, followed by a fresh water spray

- **Improved Hygiene:**
Washes and peels a large quantity of ginger and potatoes per hour to meet production demands

- **Washing and Peeling Mechanism:**
Utilizes adjustable water flow and air agitation for thorough cleaning and gentle peeling

- **Construction:**
Built with materials suitable for food processing and hygiene standards

- **Versatility:**
Suitable for washing and peeling various sizes and varieties of ginger and potatoes

- **Customization:**
Options for additional features and configurations to meet specific washing and peeling requirements

Chopping Machine GPST

- **Capacity:**
Processes up to 600 kg/hr for high-volume production

- **Motor Power:**
Equipped with a 3 HP motor for efficient chopping and grinding

- **Functionality:**
Ideal for gravy making and preparation of onion garlic masala

- **Customization:**
Options for additional features & configurations to meet specific processing needs

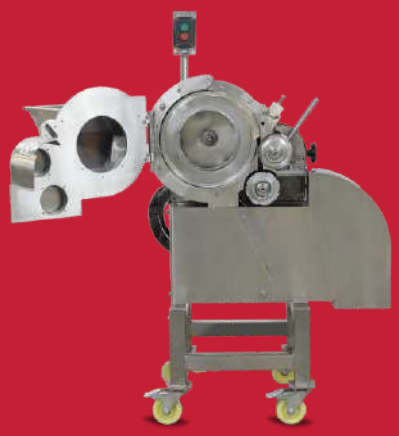
- **Increased Productivity:**
Process ingredients at high speeds to meet production demands

- **Versatile Usage:**
Prepare a wide range of dishes and food products with one machine

- **Cost-Effective:**
Reduce labor costs and minimize processing time with efficient chopping and grinding

- **Durability:**
Invest in a reliable and durable chopping machine that delivers long-lasting performance

Vegetable Dicing Machine (VD-800/ VD-1200)



- **Construction:**
Fully made of SS304 for durability and food safety

- **Capacity:**
Processes 500-1000kg/hr for high-volume production

- **Cutting Sizes:**
Obtain perfect cubes of 5mm, 10mm, 15mm, and 20mm

- **Versatility:**
Suitable for cutting a wide range of fruits and vegetables for various culinary applications

- Enhanced Productivity:
Process fruits and vegetables at high speeds to meet production demands

- Consistent Quality:
Ensure uniform cutting for improved presentation and cooking results

- Cost-Effective:
Reduce labor costs and minimize waste with efficient cutting solutions

- Durability:
Invest in a reliable and durable dicing machine that delivers long-lasting performance

Tilting Washer

- **Capacity:**
Washes 15-30kg per batch for small to medium-scale washing needs

- **Construction:**
Body made of SS304 for durability and hygiene

- **Washing Mechanism:**
Spiral action of water for thorough cleaning

- **Customization:**
Options for additional features and configurations to meet specific washing requirements

- **Enhanced Productivity:**
Process fruits and vegetables at high speeds to meet production demands

- **Consistent Quality:**
Ensure uniform cutting for improved presentation and cooking results

- **Cost-Effective:**
Reduce labor costs and minimize waste with efficient cutting solutions

- **Durability:**
Invest in a reliable and durable dicing machine that delivers long-lasting performance

Onion Peeling OP 250

- **Capacity:**
  Peels 150-250 kg of onions per hour for medium to high-volume production
- **Air Pressure:**
  Operates at 8 to 9 Kg/cm2 for efficient peeling
- **Compressor Power:**
  Equipped with a 15 HP compres- sor for powerful peeling action
- **Construction:**
  Constructed with durable materials for long-lasting use and reliability
- **Increased Productivity:**
  Save time and labor with automated onion peeling capabilities
- **Consistent Quality:**
  Achieve uniform peeling results for high-quality onions suitable for various culinary applications
- **Cost-Effective:**
  Reduce labor costs and minimize waste with efficient onion peeling solutions
- **Versatility:**
  Adapt to different onion sizes and varieties with adjustable settings and configurations

Leafy Vegetable Cutting Machine (LVC-500)

- **Capacity:**
  Processes 300-1000 kg per hour (capacity may vary depending on the product and cut size)
- **Cut Size:**
  Adjustable from 1 to 60 mm for versatile cutting options
- **Cutting Shape:**
  Shredding, ideal for leafy vege- tables and similar produce
- **Motor:**
  1.5 HP motor provides powerful, reliable performance
- **Increased Productivity:**
  High processing capacity enables faster production cycles and greater output.
- **Versatile Cutting:**
  Adjustable cut size allows you to process a variety of vegetables to your desired specifications.
- **Improved Product Quality:**
  Precision shredding ensures uniform cuts for high-quality finished products.
- **Reduced Labor Costs:**
  Automate your cutting process and reduce manual labor, saving time and money.

Multi-Purpose vegetable washer

- **Capacity:**
  Washing capacity ranges from 500kg to 3000kg per hour, cater- ing to various production scales
- **Optional Feature:**
  Washing with ozonated water for additional disinfection
- **Operation:**
  Centrifugal force for rapid and thorough drying
- **Washing Mechanism:**
  Agitation provided by an air blower for effective washing, followed by a fresh water
- **Improved Hygiene:**
  Ensure cleanliness and sanitation of fruits and vegetables for safe consumption
- **Labor Savings:**
  Reduce manual labor and save time with efficient batch washing capabilities
- **Cost-Effective:**
  Minimize waste and improve product shelf life with thorough cleaning and disinfection
- **Durability:**
  Invest in a reliable and durable vegetable washer that withstands frequent use and cleaning

Partnership Excellence

At NexGen Hygiene Systems Pvt. Ltd, we approach every partnership with a commitment to excellence. By understanding our clients' unique needs, we deliver tailored solutions that exceed expectations. Our dedication to open communication and flexibility ensures efficient and effective collaborations.

Moreover, our commitment to excellence extends beyond the initial engagement.
We provide ongoing support and maintenance to ensure lasting value for our partners. With expertise and customer-centricity at our core, we empower partners to succeed in their industries. At NexGen, excellence is the cornerstone of every partnership.

Leadership Profiles

At NexGen Hygiene Systems, we are dedicated to revolutionizing hygiene standards in industrial environments.

Our Mission

Our mission at NexGen is to lead the industry in processing technology, delivering innovative solutions that optimize efficiency, quality, and competitiveness for our clients. Through relentless dedication to innovation and excellence, we empower businesses to thrive in today's dynamic market landscape.

Heading into the Future

NexGen envisions a future where sustainability, product innovation, and global expansion converge to drive our growth.

Our food processing systems are instrumental in reducing wastage and promoting sustainability, with the potential to cut food waste by up to 40%.

We're dedicated to continuous innovation, aiming to further optimize efficiency, quality, and sustainability.

As we expand globally, we're committed to extending the benefits of our solutions, empowering businesses worldwide to achieve their sustainability goals.

At NexGen, we're shaping a future where sustainability and innovation lead to lasting positive impact.
